

Rosatom Executives Memorandum on Commitment to the Sustainable Development Principles

1. The State Atomic Energy Corporation Rosatom (Rosatom) is a Sustainable Tech Corporation with the focus on improving quality of living in all regions of its presence. Considering its overall activities and specific nuclear power plant (NPP) construction projects, Rosatom's operations make a significant contribution to the achievement of the UN Sustainable Development Goals (the SDGs), primarily:

1) *SDG 7: Affordable and clean energy; SDG 8: Decent work and economic growth; SDG 9: Industry, innovation and infrastructure; SDG 12: Responsible consumption and production; SDG 13: Climate action; SDG 17: Partnerships for the goals;*

2) *SDG 3: Good health and well-being; SDG 4: Quality education; SDG 11: Sustainable cities and communities* are also considered vital in the course of Rosatom's activities;

3) Taking into account Rosatom's product portfolio, we pay special attention to the prevention of risk related to negative impacts on *SDG 6: Clean Water and Sanitation, SDG 14, 15: Preservation of Water and Land Ecosystems* that may be related to our operations.

2. Rosatom is committed to sustainable performance in Russia and abroad in the countries of its presence in line with the UN Global Compact principles (ESG – Environmental, Social and Governance): evaluating the efficiency of its operations and establishing specific ESG goals; developing partnerships to achieve the UN SDGs; continuing an open dialogue with stakeholders on topics related to sustainable development. We strive to ensure that all Rosatom's statements and commitments in regard to the contribution to the UN SDGs and the UN Global Compact principles are supported by practical actions and specific results.

3. Priority of the sustainable development agenda for Rosatom in general and within each product area is a baseline for achieving our strategic goals 2030, including midterms 2024. Bearing in mind key specifics of Rosatom's product

portfolio and geography of its operations, we develop ESG risk management system and monitor relevant market opportunities in our activities.

4. We believe, Rosatom's product portfolio should comply with the criteria stipulated by the Rosatom internal sustainability qualification procedure¹, as well as with national and international regulations on sustainable and green products and projects². Such compliance is considered to be a part of business development process. We pay special attention to the climate and environmental efficiency of our operations, including focus on "Do no significant harm" principle, e.g. preventing negative impacts on human health and the environment. Rosatom's strategic priority in this regard is to develop products and projects for efficient energy transition both in Russia and abroad in the countries of its presence.

5. Rosatom is a world leader in technologies for clean and safe nuclear energy. We make our best efforts to ensure that nuclear energy comply with the ESG requirements, including national and international ESG regulations. Together with utmost importance of climate change combat, we are confident that it is impossible to achieve the global net-zero without nuclear energy. It is our commitment to fulfill our time and budget obligations for construction of NPP, product supply, performance of works and provision of services as a contribution to achievement of national and global climate goals. We consider our special priority to provide to all our stakeholders in Russia and abroad full and transparent information about climate efficiency, safety and security of Rosatom's technologies and solutions for human health and the environment. Rosatom places a priority to development of technologies for closing nuclear fuel cycle, as well as improvement of efficiency of radioactive waste management and spent nuclear fuel management.

6. Constant development of human potential and the human-centered approach are Rosatom's strategic objectives. Implementing social aspects of the UN Global Compact principles, we pay special attention to guarantees of equal opportunities

for our employees in Russia and abroad in the countries of its presence. We especially ensure that this principle applies to vulnerable groups of employees, such as women, youth, seniors and employees with disabilities.

7. Rosatom as a high-tech company implements digitalization through the development of useful and up-to-date digital products and solutions. Such technologically advanced approach facilitates optimization of internal and external business processes in Rosatom.

8. Rosatom strive to ensure that all our stakeholders have access to full and up-to-date information on the relevant aspects of Rosatom's activities. We appreciate an open dialogue regarding Rosatom's activities in Russia and abroad in the countries of its presence and support any form of such a dialogue based on the principles of professional ethics and mutual respect.
